and Ann Streets, and the straightening of Twelfth Street at its intersection with North University Avenue. The questions involved were referred to the Secretary and Business Manager with power within certain limits.

DeanEffinger requested that during his absence through the second semester a special additional salary or bonus be paid to Miss Horatia J. Corbin, assistant to the Dean. The Regents declined to grant this request in view of the salary already paid to Miss Corbin and in view of the general rule adopted to govern sabbatical leaves, that arrangements to carry on the work of those on leave "must be made without expense to the University beyond the full salary of the absentee," (R.P. 1920-1923, pages 434-435).

Regent Hanchett reported that the committee appointed for that purpose had made a survey of the University Health Service and would shortly be able to make a formal report (page 441).

Regent Gore filed a letter which he had received under date of January 30 from a representative of the Stare Department of Labor and Industry, setting forth that the department had recently made an inspection of the restaurants in the City of Ann Arbor and that conditions had been found in general satisfactory although there were those criticisms of a minor nature which are to be expected in every inspection in a town the size of Ann Arbor. The report recommended that all students in the University who work in restaurants should have a health chart showing that they were fit to do such work. The department further indicated that it was recommending to the local authorities that a local inspector be appointed to carry on this work currently, and to provide the usual percentage card indicating rating for cleanliness, and also health cards for all employees in restaurants.

Regent Beal filed a resolution adopted at a recent meeting of the Directors of the American Peony Society held in New York City expressing appreciation to the University of Michigan for work accomplished in the peony trial gardens at the Nichols Arboretum under the direction of Professor Aubrey Tealdi.
